QUALIFICATIONS

Python: Numpy, Pandas, Matplotlib, Seaborn, Scikit-learn

ML: Regression, Random Forest, Gradient Boosting, k-NN

Tools: SQL, Git, Linux, Jenkins, Jira

Languages: Russian (native), English (Upper-intermediate)

COURSES & SPECIALIZATIONS

- Machine Learning and Data Analysis (MIPS, Yandex) (Coursera)
- Introduction to machine learning (Coursera)
- Open Machine Learning Course (mlcourse.ai)
- Intro to Descriptive Statistics (udacity)
- Intro to Inferential Statistics (udacity)
- Intro to Data Analysis (udacity)

WORK EXPERIENCE

Performance testing engineer

Mar 2018-Jan 2020

DINS | Saint Petersburg, Russia

- Developed, used and maintained a pipeline for preparing accounts for testing. The tool pulls test accounts from Oracle DB, sends REST requests that changed settings and saves phone numbers in a specific format. Used technologies: Python, SQL, Jenkins. The tool allowed to reduce testing time.
- Collected and analyzed the statistics of phone calls with PRO and changed the method of calculating the load.
- Performed load test of telephony system (SIPp), collected and analyzed test results, found and reported big amount of performance bugs.

Performance testing engineer

Jul 2016-Mar 2018

Sberbank Technology | Saint Petersburg, Russia

- Developed load profiles based on the statistics provided.
- Developed test scripts using HP LoadRunner (Java/C).
- Checked the operability of the testing environment.
- Conducted performance testing.
- Collected and analyzed test results.

Automation engineer

Feb 2013-Mar 2016

Synergy, KIPASO | Volgograd, Russia

- Developed algorithms for industrial programmable logic controller, designed visualizations for SCADA-systems

EDUCATION

Process Automation Engineer

2008 - 2013

VSTU | Volgograd, Russia
